CNC Tool Regrinding,
Sharpening and Manufacturing

tristatetoolgrinding.com

Tri-State Tool Grinding Service Guarantee

Simply put, we stand behind all our precision tool regrinding, sharpening and machining work. We guarantee customer satisfaction on all services we perform. This guarantee covers any and all errors during the regrinding or manufacturing process. If we manufacture product(s) which do not conform to your stated specifications, or are outside of your stated tolerances, we will rerun the non-conforming products immediately and priority deliver/ship the corrected tooling to you. If the error is our fault you will not be charged for the corrective machining of your tooling, part nor delivery/shipping.

If the error is the result of non-disclosure, or inaccurate disclosure, including but not limited to, a revision change without notice, a revision change after production starts, lack of or inaccurate tolerance call out, lack of or inaccurate finish grade call out, etc, Tri-State Tool Grinding is still happy to rerun your production run at the first opportunity, however the expense(s) are billable to you.
